

COVER LETTER

I'm talented jewelry designer with more than 25 years of experience, having strong practical basis in the jewelry handicraft manufacturing which I was specialized in since the beginning of my professional path.

I joined several companies in Lebanon, Saudi Arabia and UAE-Dubai as Designer and Model-Maker Supervisor, where I drew and followed-up many artistic fine Jewelry models.

I developed my computer drawing techniques and imposed my designing talent as well as my model making experience which qualified me to employ successfully the newest CAD/CAM (Rapid Prototyping) technology, and adopted the new modeling methods in my service bureau "HELA_{EST.}", where I offered 3D modeling services to the jewelry designers and makers worldwide. Well in short, I provided high quality 3D wax Master-Molds ready for Gold-Silver casting as basic elements for mass or individual production.

I built during my work progression, an exquisite modeling portfolio, I'm proud to present it on my business interviews.

I'm interested in a challenging vacancy, so I can express, share and develop my expertise in this field.

Sincerely yours,
Hussein SHAWA
